

BS10H PORTABLE

- Suitable from microbore through to -10 (DN16) 2SN.
- Ideal for maintenance and agricultural repairs.
- Lightweight at only 18kg.
- Direct reading micrometer setting.
- 2-Speed handpumps fitted as standard.
- For use on a wide range of hose and fittings.

The annular BS10H offers a compact, high performance, new solution to 'on site' and maintenance hose repairs independent of a power supply and at only 18kg can be carried literally anywhere you need to go. With the capacity to assemble microbore through to -10 (DN16) 2SN hoses, the BS10H is suitable for maintenance, workshop, mobile or breakdown /standby use and is naturally built to the usual high standards you have come to expect from Banner.

The BS10H is supplied as standard with a basic range of 3 sets of quick to fit die sets – 16, 20 and 23mm – allowing assembly of spiral hoses from -04 (DN6) to -10 (DN16). All dies come in a purpose built plastic toolbox with the machine. Extra Dies 6, 8, 10, 12, 14, 18 and 26mm for microbore and intermediate hose assembly are also available. You can have cluster quick change dies as well with this machine.

Machine setting and adjustment is simple. The swage size setting is achieved by adjusting the direct reading micrometer type gauge. Select and fit the appropriate dies, set the machine gauge to the required finished diameter and then operate the hand pump until the gauge setting is reached.

STANDARD/CLUSTER DIE SETS

Code	Swage Range	L(mm)
16	16-20	50
20	20-23	50
23	23-26	50

EXTRA DIE SETS

6	6-8	50
8	8-10	50
10	10-12	50
12	12-14	50
14	14-16	50
18	18-20	50
26	26-29	50

SPECIFICATIONS

Capacity	-10 (DN16) 2SN
Actuator	Single acting spring return 50 tonne ram
Pump	Integral 2 speed
Standard dies	16, 20 and 23mm
Extra dies	6, 8, 10, 12, 14, 18 and 26mm
General	Maximum die length = 50mm Maximum swage diameter = 34mm Max opening over die = die + 20mm Die holder throat (open) = 55mm
Crated details	36 × 38 × 30cm(h) Gross weight 20kg
